Important: Relocate "Get Directions"
Posted by Jimmy - 2011/11/29 13:41

_____

Moxie is up and running fine.

My issue:
When a listing shows, the map show beneath it and the "Directions/Get Directions" box shows to the left of the map.

This compresses my map horribly.

Requested Fix:
I would like to be able to place the "Directions/Get Directions" box beneath the map.

I have searched for a variable I can change to facilitate this but do not see one. If you will provide any specific code changes I will implement them.

Thank you in advance.

Versions: Joomla 1.5.22 / Moxie Maps 2.6 / Mosets 2.1.10

_____

I just bought your product. I submitted a support ticket in tandem with it. We are on 3 days now and I am beginning to think I will be ignored into perptuity. If I cannot discuss my issues with my PAID product here, then perhaps it will be better for me to seek support on the Jommla extensions page? :huh:

Sam...if you're in jail I might be able to supply some bail money. :ohmy:

I need answers here. Might anyone else in these forums know the answer to my question? I'm assuming it's some sample .css changes. Not a programmer myself but I can follow directions.

_____

help please
where are the files to be translated into another language - Direktions, Starting Address, etc.?
